

uPVC Carpet Trunking

Active's Carpet Trunking is an ideal solution for protecting cables and cords across open floors and between door frames. It is durable, safe and easy to install.

Our Trunkings are manufactured from durable uPVC to provide high insulation performance, lightweight and corrosive free properties. The base has two dividers and a snap off cover for easy access and installation, which can be secured by adhesive, screws or nails. The arc-shaped covers are designed to protect and organize cables and cords in any kind of environment. They provide strong shock resistance for uses where there is heavy human traffic or equipment traffic such as trolley.
